

- 
- A scatter plot on a white background with a black crosshair. Data points are colored circles representing different locations. Overlaid on the plot are several colored ellipses representing confidence intervals or clusters for each location. The locations and their corresponding colors are: Goiás (black), Paraná (orange), Bahia (light blue), Rio Grande do Sul (teal), Nebraska (yellow), Minas Gérias (dark blue), Argentina (brown), and Mato Grosso do Sul (pink). The ellipses for Goiás, Bahia, Rio Grande do Sul, Paraná, and Mato Grosso do Sul are clustered in the upper-left quadrant. The ellipse for Nebraska is in the lower-right quadrant. The ellipse for Argentina is in the lower-left quadrant. There are also a few isolated points for Rio Grande do Sul and Paraná in the lower-right quadrant.
- Goiás
  - Paraná
  - Bahia
  - Rio Grande do Sul
  - Nebraska
  - Minas Gérias
  - Argentina
  - Mato Grosso do Sul
